George provides word processing and table formatting support. Editorial support is furnished by Martha R. Evans, Publications Services Branch, Information Services Division. Data Processing support is provided by Kenneth King and William Meiller, Information Technology Services, Information Services Division.

## **Digest**

**Fiscal 1994 Exports Ahead of Fiscal 1993** (see page 2)--U.S. agricultural exports totaled nearly \$40 billion during October 1993-August 1994, about \$600 million higher than the same period of fiscal 1993. The United States normally exports over three-quarters of its agricultural commodities to its top-ten markets, and so far nearly \$31 billion worth of goods were sent. Japan, the European Union (EU), and Canada continue to be dominate markets with over \$19 billion worth of commodities exported through August. Mexico, Taiwan, Korea, the former Soviet Union (FSU), Hong Kong, China, and Algeria complete the top markets.

**Imports Reach Record High** (see page 6)--Fiscal 1994 U.S. agricultural imports reached a record \$24 billion for October 1993-August 1994, up 7 percent from the same period in fiscal 1993. Competitive imports were \$1 billion higher at \$18.5 billion and noncompetitive imports rose \$400 million to \$5.5 billion.

The **U.S. Agricultural Trade Boosts Overall Economy** article, which usually appears in the September/October issue of **FATUS**, is scheduled to appear in the November/December issue. Data revisions for the article were not completed when this issue was prepared for publication.

The United States Department of Agriculture (USDA) prohibits discrimination in its programs on the basis of race, color, national origin, sex, religion, age, disability, political beliefs and marital or familial status. (Not all prohibited bases apply to all programs). Persons with disabilities who require alternative means for communication of program information (braille, large print, audiotape, etc.) should contact the USDA Office of Communications at (202) 720-5881 (voice) or (202) 720-7808 (TDD). To file a complaint, write the Secretary of Agriculture, U.S. Department of Agriculture, Washington, D.C., 20250, or call (202) 720-7327 (voice) or (202) 720-1127 (TDD). USDA is an equal opportunity employer.

## Fiscal 1994 Exports Ahead of Fiscal 1993

U.S. agricultural exports totaled nearly \$40 billion during October 1993-August 1994, about \$600 million higher than the same period of fiscal 1993. The United States normally exports over three-quarters of its agricultural commodities to its top-ten markets, and so far nearly \$31 billion worth of goods were sent. Japan, the European Union (EU), and Canada continue to be dominate markets with over \$19 billion worth of commodities exported through August. Mexico, Taiwan, Korea, the former Soviet Union (FSU), Hong Kong, China, and Algeria complete the top markets.

In recent years almost 50 percent of U.S. agricultural exports were shipped to Japan, the EU, and Canada. Although fiscal 1994 exports to Japan already reached a record \$8.5 billion, exports to the top-three markets were 1 percent less in fiscal 1994 compared with fiscal 1993. Exports of \$6.1 billion to the EU were 14 percent lower than last year, and exports to Canada rose less than 1 percent, offsetting gains to Japan.

U.S. exports to Japan were nearly \$800 million higher than last year. In 1994 the strength of the Japanese yen vis-a-vis the dollar has lowered the costs of imports and stimulated demand for imported food items. Also, the value of wheat, coarse grain, and soybean exports to Japan rose because of higher prices during fiscal 1994. Export volume for these commodities actually declined to 19 million tons from 21.5 million tons in fiscal 1993. U.S. rice exports were 519,000 tons, valued at \$250 million. The United States shipped record levels of vegetables because of Japan's poor summer vegetable harvest. The value of U.S. vegetable exports reached nearly \$550 million through August, \$150 million above fiscal 1993.

U.S. exports to the EU dropped over \$1 billion to \$6.1 billion through August. Soybean shipments fell 2.3 million tons to 6 million tons through August 1994. Sharply higher U.S. soybean prices and lower EU import demand combined to slow U.S. soybean exports. The value of U.S. soybean exports fell to \$1.5 billion from \$1.8 billion. U.S. tobacco exports dropped to \$435 million from \$570 million as there was plenty of lower-priced tobacco available from competing exporters.

Exports to Canada were unchanged from a year earlier at \$4.8 billion. Most of the gain to Canada was in animal feeds and processed grain and

vegetable products. Coarse grain and soybean shipments were sharply lower.

Excluding Japan, markets with the largest export gains compared with October 1992-August 1993 were Mexico, Taiwan, Hong Kong, China, and Algeria. Exports to Mexico, Hong Kong, and Algeria have already reached record values.

Shipments to Mexico of \$3.7 billion through August 1994 have already surpassed record exports of fiscal 1992. Exports were nearly \$300 million higher than fiscal 1993 because of Mexican economic growth and the North American Free Trade Agreement (NAFTA). NAFTA accounted for an immediate gain in beef and corn exports as Mexican beef import tariffs were lowered in January 1994, and corn exports expanded under the tariff-rate-quota agreement. Beef exports totaled \$170 million compared with \$128 million the previous year. Corn exports totaled 1.4 million tons through August, up from 350,000 tons in fiscal 1993.

Exports to Taiwan rose to \$1.9 billion, compared with \$1.8 billion last year. Part of the gain to Taiwan was due to higher prices for corn and wheat. The value of corn exports rose to \$549 million, up from \$514 million, but volume was 7 percent lower at 4.5 million tons. Wheat rose to \$159 million, up from \$126 million, and volume rose 5 percent to 827,000 tons. Fresh fruit exports rose to \$155 million from \$118 million on increased shipments of oranges, peaches, and plums. The value of apple shipments rose, but volume was unchanged. Cattle hide exports rose 28 percent to \$133 million, and volume rose 22 percent to 2.2 million hides.

U.S. exports to Hong Kong reached \$1 billion through August, surpassing last year's record exports of \$880 million. Cotton exports accounted for most of the gain. Cotton shipments increased over 500 percent to \$100 million because Hong Kong imported U.S. cotton as world supplies tightened when Pakistan and China had production shortfalls in 1994. Poultry meat exports were up \$60 million over last year to \$196 million.

U.S. exports to China reached more than \$780 million through August 1994, surpassing last year's \$322 million, and reaching the highest level since fiscal 1990. U.S. cotton exports accounted for the turnaround in 1994. Through August, cotton shipments totaled nearly 300,000 tons

valued at \$485 million, compared with 160 tons at \$158,000 in 1993. Wheat exports were 4 percent lower at 2 million tons, but the value of wheat exports dropped 25 percent because China received substantial EEP bonuses to encourage wheat imports. In fiscal 1994, the export unit value of wheat shipped to China was \$86 per ton, compared with \$109 per ton in fiscal 1993.

U.S. exports to Algeria totaled \$570 million, up from \$414 million in 1993. Wheat accounted for

nearly \$293 million. Continued drought conditions required Algeria to import wheat to meet its food needs in 1994. Corn shipments were down slightly at 1 million tons, but value was 11 percent higher at \$118 million. Soybean oil exports nearly doubled to \$90 million. (*Joel Greene, Trade Analysis Branch, 202-219-0816*)

Table 1--Agricultural, nonagricultural, and total trade balance of exports and imports

## Imports Reach Record High

Fiscal 1994 U.S. agricultural imports reached a record \$24 billion for October 1993-August 1994, up 7 percent from the same period in fiscal 1993. Competitive imports were \$1 billion higher at \$18.5 billion and noncompetitive imports rose \$400 million to \$5.5 billion.

With 1 month remaining in fiscal 1994, import gains appear to be widespread and due to a variety of factors. The poor 1993 U.S. grain and oilseed crop contributed to import demand, and the implementation of the North American Free Trade Agreement in January 1994 made some Canadian and Mexican products more attractive.

Vegetable imports were \$2.5 billion, up nearly \$200 million from the previous year. Tomatoes, peppers, and onions from Mexico were the major vegetable imports. Vegetable imports from Mexico were valued at \$1 billion. Grain and feed imports reached \$2.1 billion, 46 percent over the

previous year. Wheat imports from Canada doubled to 2.6 million tons, contributing to the \$668 million gain in total grain and feed imports. Year-to-date coffee value was nearly \$350 million higher than the same period last year, up 25 percent in value to \$1.7 billion. Coffee import values surged due to frosts in Brazil, and coffee roasters were forced to replenish already-depleted inventories. Volume fell from 1.1 million tons a year ago to 889,000 tons so far this year. Beer and wine imports rose 7 percent to end the period at \$1.9 billion. Canada was the major source for beer while Italy shipped the most wine. Oilseeds, primarily soybeans and rapeseed from Canada, gained also, rising by \$249 million to \$1.4 billion for a year-to-date gain of 22 percent. Total soybean imports surged by \$31 million to \$42.7 million and volume jumped from 56,000 tons to 174,000 tons. Fruit and fruit juices, and pork imports also rose. Tobacco, livestock, and beef imports were lower. *(Tom Capehart, Trade Analysis Branch, 202-219-1262)*

## SUMMARY OF REPORT #AIB-708

# Intense Agrichemical Use on Europe's Farms Creates Environmental, Budget Problems

October 1994

Contact: Philip I. Szmedra, 202-219-0475

**A**gricultural production in the European Union (EU, the successor to the European Community) has increased dramatically since the early 1950's but at a considerable environmental cost. Artificially high commodity prices maintained through the Common Agricultural Policy (CAP) have encouraged heavy investment in improved technologies and reinforced intense use of such agricultural inputs as fertilizers and pesticides. Resulting environmental degradation has included nitrate pollution of drinking water and loss of wildlife species. However, major reform of the CAP in May 1992 to address these problems included direct payments to farmers, increased measures to limit production, and other programs specifically designed to produce environmental benefits. Input use in U.S. agriculture is only a fraction of that in Europe and arable land area much more extensive. In the future, American farmers will face less severe tradeoffs between productivity and environmental preservation than their EU counterparts.

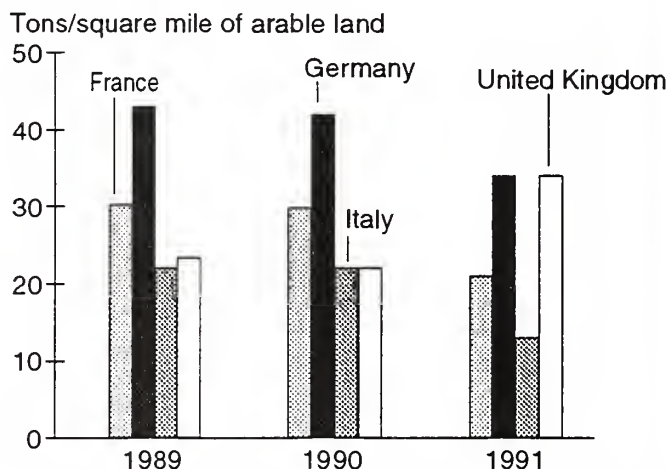

These findings are reported in a new report from USDA's Economic Research Service, *Agriculture and the Environment in the European Union*.

Trends in chemical fertilizer and pesticide use in the EU reflect two distinct and opposing influences. First, high support prices established and maintained under the CAP have provided incentives for farmers to use inputs heavily. Second, input use has declined in regions with recognized environmental problems. Between 1985 and 1989, nitrogen fertilizer use decreased by 13 percent in the Netherlands, 12 percent in Italy, and 6 percent in the United Kingdom. In Denmark, Germany, and Belgium, nitrogen fertilizer use remained essentially unchanged, but farmers in France, Ireland, Portugal, and Spain increased their use of nitrogen fertilizers by 10 to 15 percent.

France is the largest market for agrichemicals within Europe, annually purchasing about a third of the compounds sold in the Western European market. The growing influence of environmental action groups and the recent discovery of nitrates in drinking water have heightened awareness of the harmful effects of input-intensive agriculture.

### Nitrogenous fertilizer use

Increased environmental awareness in some European countries is helping lower nitrogenous fertilizer use

Source: Organization for Economic Cooperation and Development, *State of the Environment*, Paris, France, 1991.

ERS-NASS  
341 Victory Drive  
Herndon, VA 22070.

The countries in the Mediterranean region are generally less developed than their northern neighbors and characteristically express a greater concern for "pulling even" economically rather than controlling or cleaning up pollution created by agricultural productivity increases and industrial expansion. Maintaining small, marginally profitable farms is a key concern of agricultural policy in the south.

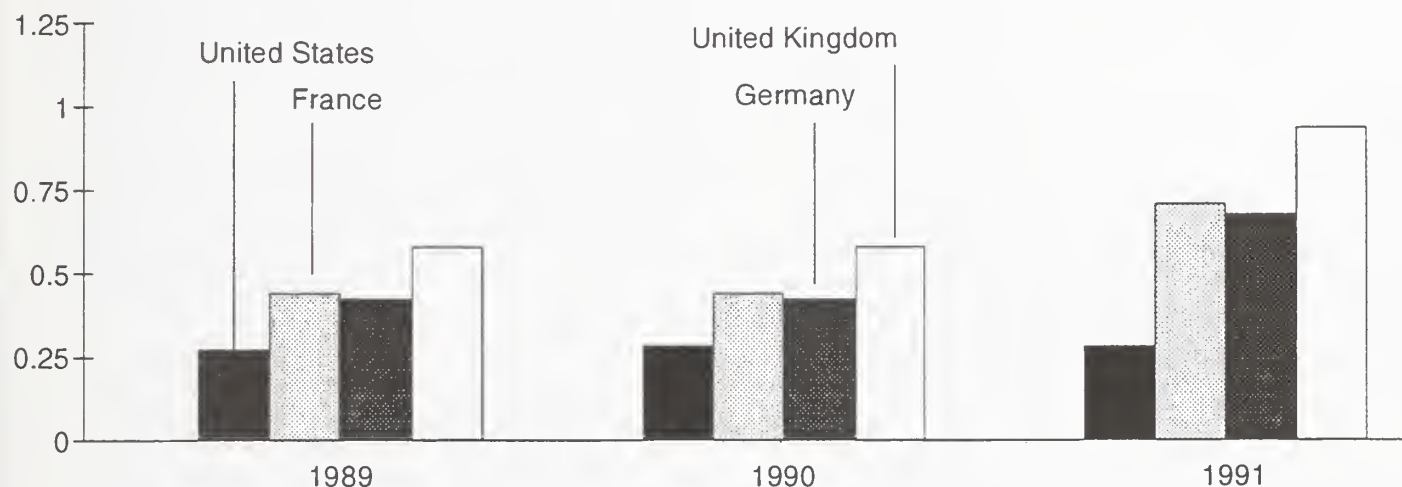

CAP expenditures have had some positive results. The EU's balance of trade has been markedly aided by agricultural exports. EU farmers have adopted labor-saving technologies. Agricultural sector real incomes have grown rapidly and now appear more stable than U.S. farm incomes. Yields for field crops have been exceptionally high because of heavy input use.

However, the CAP has directly or indirectly contributed to unwanted effects. EU food prices are higher than in world markets. Some commodities continue to be produced at surplus levels. Heavily subsidized agricultural export policies have led to accusations that the EU is guilty of unfair trade practices. CAP expenditures for surplus food commodities in the late 1980's were equivalent to 49 percent of the final value of agricultural output in the EC compared with 22 percent in the United States. And, high input-use levels have created or contributed to environmental degradation.

## Pesticide use

Pesticides are used more intensively in countries of the European Union than in the United States

Tons/square mile arable land

## SUMMARY OF REPORT #AIB-702

# New Report Describes Marketing Practices for Vegetables

August 1994

Contact: Dennis R. Henderson, (202) 219-0866

**A** new report, *Marketing Practices for Vegetables*, just released from USDA's Economic Research Service describes vegetable marketing practices of first handlers (firms that receive growers' vegetables), provides estimates of each method's prevalence, and explains the basic motivation for each procedure. Over time, these practices have evolved and expanded with some becoming more important than others.

First handlers of vegetables use many methods to acquire and market vegetables. These methods and their prominence are strikingly different for fresh vegetables, fresh precut vegetables, and processed vegetables (see table).

Packer-shippers (firms that receive and sometimes sort, clean, pack, and ship produce) handle most fresh vegetables. These firms pack and sell fresh vegetables that they grow themselves, are grown in joint ventures, or are acquired from growers under marketing contracts. Retailers, wholesalers, institutions, foodservice establishments, and merchants are the principal buyers of fresh vegetables.

Packer-shippers perform different services based on volume of produce handled. For example, large-volume packer-shippers grow much of the fresh vegetables they pack and also sell much of it themselves. They typically use labels and brands to differentiate their products and inform buyers, including consumers, that they are a consistent supplier of known high-quality vegetables. Small-volume packer-shippers, by contrast, pack mostly fresh produce of independent growers and commonly contract with an agency for sales services.

Fresh precut vegetables, in contrast to fresh market vegetables, are mostly sold under agreements or marketing contracts that establish a tentative selling price

for vegetables delivered over a 6- to 12-month period to retailers, institutions, and foodservice establishments.

Vegetable processors acquire supplies predominantly by production contracts with growers and also process vegetables they grow themselves. Grower bargaining associations and processors sometimes negotiate the price and other terms established in these contracts. Otherwise, processors establish terms and extend production contracts to selected growers. Processed vegetables are sold to retailers, wholesalers, institutions, and foodservice establishments, usually for spot delivery or deferred delivery as specified in a contract.

The report is the first in a series of bulletins that describe the methods first handlers use to acquire and market farm commodities and to price these commodities.

## SUMMARY OF REPORT AER-700

# U.S. Rice Exports Continue High, as Domestic Use Surges

October 1994

Contact: Parveen Setia, 202-501-8515

**W**orld demand for U.S. rice remains high, and domestic use is rising as well. Consistent with previous years, the United States is expected to rank second among world rice exporters in 1994, behind Thailand. The United States supplies nearly 17 percent of the world market. World rice trade in 1994 is expected to total a record 15.5 million tons. Japan's decision to import rice from the United States, Thailand, and China in late 1993, after a shortfall in its production, explains much of the large increase in world rice trade.

A new report by USDA's Economic Research Service, *The U.S. Rice Industry*, reviews all aspects of the industry, including supply, demand, prices, Government programs, rice quality, the marketing system, and trade.

In recent years, the United States has been exporting nearly half its rice crop, or 70 to 80 million cwt, with the rest used to satisfy the domestic market. By contrast, from 1960 to 1990 the U.S. rice industry exported about 60 percent of its production.

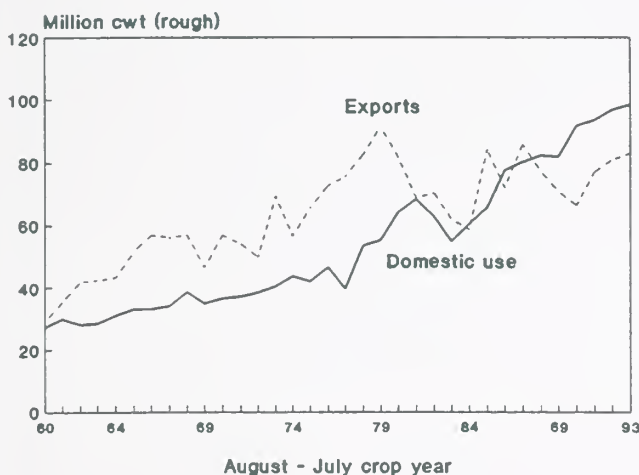

Domestic consumption now accounts for over half of the total use, up from 40 percent in 1980/81. It has grown faster than the population rate, thus providing millers a viable market. Per capita consumption of rice is rising at the rate of about 1 pound per year and currently stands at more than 22 pounds.

A rise in the U.S. Asian and Hispanic populations has been a major factor in increased domestic demand for rice. Health benefits associated with increased consumption of rice, which is free from sodium, fat, and cholesterol, have played a key role in raising domestic demand as well.

The introduction of several quick cooking rice dishes, such as boil-in-the-bag items and microwavable dishes, has further encouraged domestic consumption. The rice industry has highlighted both the nutritional value and convenience of rice in its marketing efforts.

Rice use in processed food is the fastest growing category. Processed food use includes such products as breakfast cereals, pet food, package mixes, candy, soup, baby food, crackers, rice pudding, confectioneries and snack items, cooking batters, and desserts.

Outlets for U.S. rice
